PROFILE

Senior software developer with **12+ years of professional experience** building and shipping production web applications. Specialises in **Ruby on Rails** backend development — API design, database optimisation, and scalable service architecture — with solid frontend experience in React and Next.js. Has worked across e-commerce, fintech, and SaaS domains, consistently taking **end-to-end ownership** of features from schema design through to deployment. Comfortable in agile teams, remote environments, and codebases that demand both clean code and high performance.

EXPERIENCE

Senior Software Developer

Feb 2023 — Present

[Fluid Tech. Inc.](#) — Utah, US (Remote)

- Architecting and building core backend services for a **multi-tenant direct sales platform** using Ruby on Rails.
- Designing **REST APIs** consumed by web, mobile, and third-party integrations with a focus on performance and reliability.
- Owning features end-to-end: from schema design through to deployment and monitoring.

Senior Software Engineer

Oct 2019 — Aug 2022

[Whitehat Engineering](#) · [ZenLedger](#) — Washington, US (fully remote)

- Engineered **high-throughput APIs and data ingestion pipelines** to import and reconcile millions of blockchain transactions from a range of exchanges and wallets.
- Diagnosed and resolved **SQL performance bottlenecks** — query rewrites, index tuning, and EXPLAIN-driven optimisation on large PostgreSQL datasets.
- Designed and scaled the **automated report generation pipeline** to handle millions of records without degradation under peak load.
- Built and maintained **background job infrastructure** (Sidekiq) for async processing of large CSV imports and third-party data sync.
- Reduced long-running import jobs by re-architecting **batch processing** strategies, cutting processing time significantly for large portfolios.
- Collaborated remotely and async with a US-based team; maintained high ownership with minimal supervision.
- Practiced **TDD** throughout — wrote comprehensive unit and integration tests; participated in code review and on-call rotation.

Senior Web Developer

Mar 2014 — Oct 2019

[Proshore Nepal](#) — Kathmandu

- Led backend development of large-scale e-commerce platforms; owned architecture, specs, and delivery across multiple projects.
- Lead developer for Ekoplaza — a **custom Phalcon-based e-commerce system**; coordinated with Dutch product owners and distributed remote teams.

HIGHLIGHTS

- ✓ 12+ yrs professional experience
- ✓ Ruby on Rails specialist
- ✓ REST API design & architecture
- ✓ PostgreSQL & query optimisation
- ✓ Background jobs & async pipelines
- ✓ React / Next.js frontend
- ✓ E-commerce & fintech domains
- ✓ TDD & clean code practices
- ✓ Remote & distributed teams
- ✓ End-to-end feature ownership

SKILLS

BACKEND

Ruby on Rails REST APIs
Sidekiq PHP Node.js
Firebase

DATA

PostgreSQL Query optimisation
MySQL Redis

FRONTEND

React Next.js TypeScript

INFRA & OPS

AWS Docker CI/CD Git
Heroku

WORK STYLE

- Delivered multiple client-facing Magento stores end-to-end, including custom module development, third-party integrations, and performance tuning across diverse retail verticals.
- Mentored junior engineers; established coding standards and review processes across the team.

Magento Developer

Dec 2012 – Mar 2014

EB Pearls — Lalitpur

- Promoted from intern; built e-commerce stores, custom extensions, and third-party integrations from scratch.

Freelance Developer

Various

- TalentArmy**

Firestore Cloud Functions — job-ad import APIs (JobAdder → Webflow).
- ZeFi**

Migrated frontend React → Next.js; Firestore CMS and API development.
- Solo**

Backend API contributions for worksolo.com.

EDUCATION

MSc. Computer Science

2019

Nepal College of Information Technology, Lalitpur

BSc. Computer Science & IT

2013

Kathford International College of Engineering & Management
